

BENEFITS OF GROWTH FACTORS FOR YOUR SKIN

Skin Damage

Negative elements like the sun's UV light, chemicals found in food, and pollution in the air can all generate free radicals within our skin. Scientists say that this permanent damage, known as photoaging, accounts for 90% of the skin's perceived aging—including wrinkles, roughness, pigmentation, and loss of elasticity. As we age, the damage caused by photoaging does not heal or repair, ensuing the need for a natural rejuvenation supplement to repair our skin to a more youthful appearance.

Why Growth Factors?

Growth factors are proteins that promote the growth, organization, and maintenance of cells and tissues. The topical application of growth factors has been clinically proven to help reverse photo-damaged skin. Topically applied growth factors can supplement the diminished production of growth factors found within photoaged skin. They can also assist in restoring the dermis and epidermis to a more youthful state by increasing collagen, elastin, and hydration; thereby decreasing the appearance of fine lines and wrinkles.

As we age, our skin loses its ability to naturally heal itself, resulting in a:

- Decrease in the amount of collagen our skin produces
- Loss of stored antioxidants in the skin
- Loss of skin elasticity, resulting in saggy skin and baggy eyes
- Increased appearance of fine lines and wrinkles

AQ Skin Solutions focuses on a scientific and natural approach to skin care

Our products contain hi-purity human fibroblast growth factors. These growth factors are naturally made by the body's fibroblast (skin) cells. As we age, the production of these growth factors decreases, resulting in the inability of the skin to rejuvenate. Supplementing the skin with these growth factors can help the skin naturally rejuvenate itself, returning the skin to its youthful state.

AQ Active Serum should be applied lightly over clean skin on the entire face, neck, and chest areas. Moderate skin renewal may occur within two weeks, but optimal improvement is usually seen after six weeks of daily use:

- Skin looks significantly younger with regular use
- Diminishes wrinkles and fine lines
- Gives skin a youthful glow and gradually fades sun/age spots
- Growth Factor technology restores youthful skin function to repair damage
